creation to installation

SCREENS BROCHURE

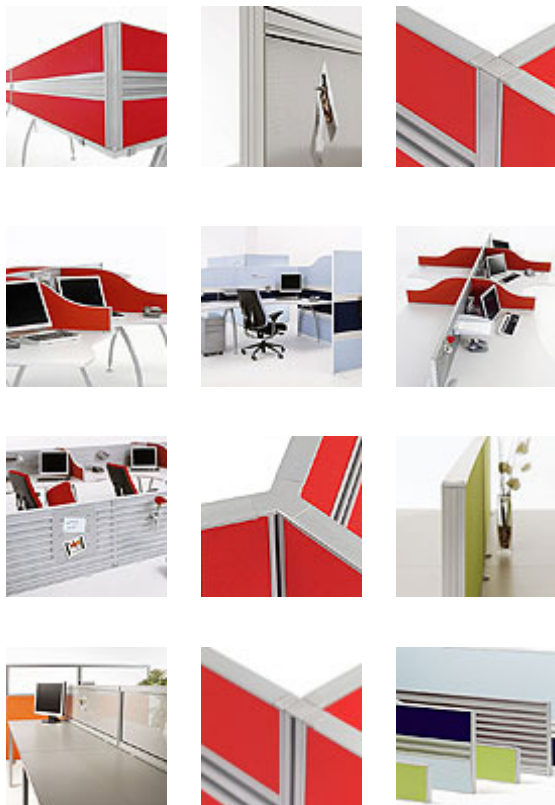

SCREENS

- *Origin utilises a full aluminium frame which has been streamlined to enhance the aesthetics. This frame allows for flexible specification and comes in a multitude of finishes. The frame itself comes in a silver or graphite finish as standard however the frame can be coated in any RAL or BS colour required.*
- *Origin has many innovative features which include matching captive sliding top caps and multi-functional links which double as end trims.*
- *Each Origin screen comes with an inline link and a 90 degree link as standard which are supplied in both graphite and silver to co-ordinate with the frame finish.*
- *This screen range is available as desk-up, flypast and free standing with both wave and straight tops available.*

SCREENS

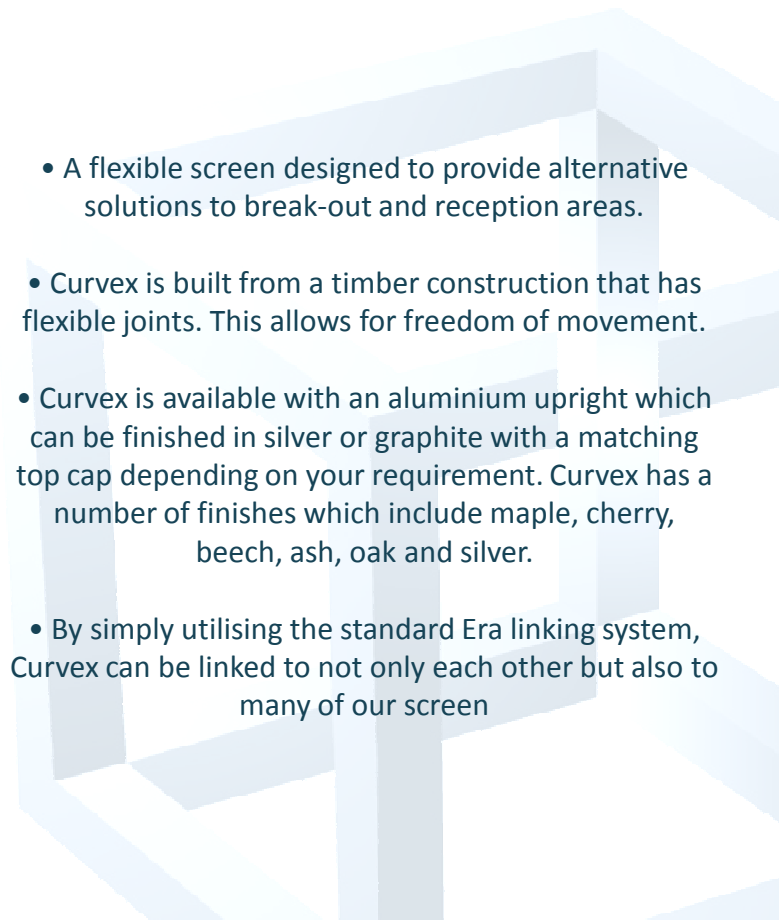

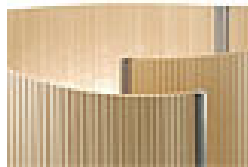

• *Fusion is an extremely slim line aesthetically pleasing product. Made from a 30mm aluminium picture frame, Fusion provides enhanced protection and aesthetics.*

• *The Fusion screen has a simple, unique and rigid metal linking system which is supplied with each screen as standard and is not visible to the eye. This discreet linking system which is hidden inside the screen enables quick and easy installation. Fusion screens are constructed using our durable lightweight internal panel.*

• *Fusion's frame is complemented by colour matched end trims and capping which are supplied as standard with each screen. Colour matched brackets and feet are also available on request.*

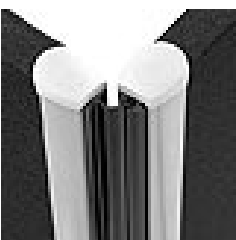

• *Fusion is available in a variety of screen types including free standing, desk-up, flypast, goal post, goal post electric and curved and can be specified with either a straight or a wave top. Fusion also comes in a multitude of finishes ranging from fabric and vinyl to glazing, laminates and perforated steel mesh.*

SCREENS

- A flexible screen designed to provide alternative solutions to break-out and reception areas.
- Curvex is built from a timber construction that has flexible joints. This allows for freedom of movement.
- Curvex is available with an aluminium upright which can be finished in silver or graphite with a matching top cap depending on your requirement. Curvex has a number of finishes which include maple, cherry, beech, ash, oak and silver.
- By simply utilising the standard Era linking system, Curvex can be linked to not only each other but also to many of our screen

SCREENS

- *2 Series is our economy screen range with many features to offer, one being the ability to link to 1/3/5 Series, Curvex and Origin.*

- *Screens have aluminium uprights which provide strength and are available in silver and graphite as standard. However, 2 Series can be finished in any RAL or BS colour.*

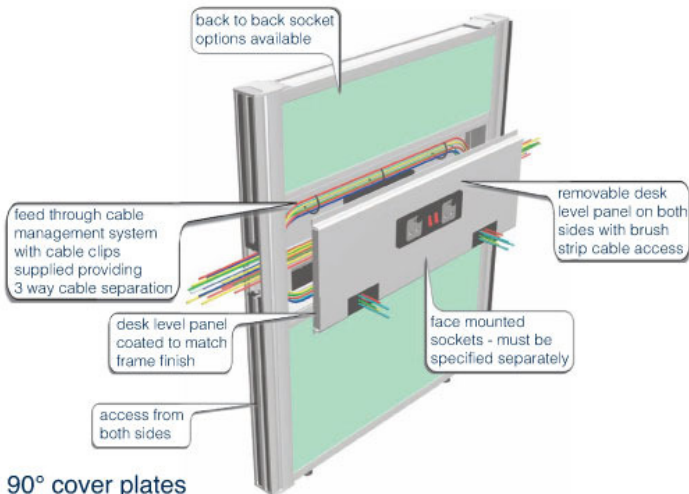

- *2 Series can be used to create both free standing and desk-up configurations and is available in both fabric and glazing as a standard finish.*

- *2 Series tops can be styled as a straight, wave or an arc which is dependent on your requirement*
